

Project Design Phase Problem – Solution Fit Template

Date	1 October 2026
Team ID	SWTID-2026-8542
Project Name	ComicCraft - AI Comic Story Creator using Gemini Models
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- Solve complex problems in a way that fits the state of your customers.
- Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- Sharpen your communication and marketing strategy with the right triggers and messaging.
- Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- **Understand the existing situation in order to improve it for your target group.**

Problem – Solution Fit of ComicCraft:

ComicCraft addresses a simple problem: many people have creative story ideas but lack the writing-plus-drawing skills, time or budget to turn them into comics. ComicCraft uses Gemini and Stable Diffusion to generate the storyline, dialogue and illustrations automatically, so anyone can create and download a complete comic. The canvas on the next page maps this fit.

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Students, hobbyists, teachers, storytellers and social-media content creators who have story ideas but cannot draw or design. Casual, non-technical users who want a finished comic quickly.	6. CUSTOMER CONSTRAINTS CC No drawing or design skills; little time; no budget to hire artists or buy paid tools; needs a simple browser-based interface; AI image generation needs a capable GPU or good internet connection.	5. AVAILABLE SOLUTIONS AS Hiring illustrators (costly, slow); manual tools like Canva or Pixton (need design effort); pen and paper; generic AI image tools. Pros: familiar, flexible. Cons: no story generation, no panel continuity, time-consuming, no automatic PDF.	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Turn a simple story idea into a complete illustrated comic; get a panel-by-panel storyline with narration and dialogue; keep a consistent tone and art style; save and share the comic as a PDF.	9. PROBLEM ROOT CAUSE RC Making a comic needs two skills at once: writing and illustration. Most people have only one, and existing tools treat story and art separately, so the process is slow, inconsistent and discouraging.	7. BEHAVIOUR BE Sketch by hand, search for templates, or use separate AI tools for text and images and combine them manually. Ask friends or artists for help. Many give up halfway. Indirectly: share stories and art on social media.	
Focus on J&P, tap into BE, understand RC	3. TRIGGERS TR A school or class assignment; wanting a personalised story for kids or a gift; seeing AI-generated art online; having a story idea they want to visualise; needing content for social media.	10. YOUR SOLUTION SL ComicCraft is a web app built with FastAPI. The user enters a story prompt, character name, setting, tone and art style. Gemini Flash creates a 5-panel outline, Gemini Pro writes narration and dialogue, and Stable Diffusion draws each panel. The user previews the comic in the browser and downloads it as a PDF.	8.1 ONLINE CH Search for comic makers and AI story tools, watch YouTube tutorials, browse Pinterest and Reddit for ideas, try free online tools, share finished work on social media.	Focus on J&P, tap into BE, understand RC
	4. EMOTIONS: BEFORE / AFTER EM Before: frustrated, unskilled, overwhelmed, discouraged. After: creative, confident, proud, excited to share their finished comic.		8.2 OFFLINE CH Ask friends, teachers or artists for help, sketch on paper, discuss story ideas in class or groups, print and share comics with family and classmates.	
Identify strong TR & EM	Extract online & offline CH of BE			

Problem – Solution Fit Summary (ComicCraft):

Canvas Block	ComicCraft Details
Customer	Students, hobbyists, teachers, storytellers and content creators without drawing skills
Problem	Cannot turn story ideas into illustrated comics quickly and affordably
Root Cause	Comic creation needs both writing and illustration skills; existing tools separate story from art
Current Alternatives	Hiring artists, manual tools (Canva, Pixton), pen and paper, generic AI image tools
Trigger	Assignments, gifts or stories for kids, social media content, a new story idea
Solution	Web app that generates a 5-panel outline, narration, dialogue and images from a short prompt
AI Models	Gemini Flash (outline), Gemini Pro (narration and dialogue), Stable Diffusion (illustrations)
Customisation	Character name, setting, tone and art style chosen by the user
Outcome	Preview in browser and download a complete comic as a PDF; user feels creative and confident
