

AI Comic Story Creator

Customer Journey Map | using Gemini Models + Stable Diffusion

Team ID: SWTID-2026-8542

Project: ComicCraft - AI Comic Story Creator using Gemini Models

Based on the ComicCraft user scenarios and workflow: Gemini Flash (outline), Gemini Pro (story), Stable Diffusion (images), FPDF (export)

SCENARIO Entering a story idea, generating, customizing, previewing and exporting an AI comic	Entice How does someone initially become aware of this process?	Enter What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?						
S Steps What does the person (or group) typically experience?	Hear about ComicCraft Users learn about the AI comic maker through friends, social media or a search for easy comic creation. Open the web app The user opens the ComicCraft home page (index.html) in a browser. Read the home page They see a clean page with a scenic background and a simple story form. Review the input fields Story prompt, character name, setting, tone and art style are clearly listed. Write a story prompt Types the main idea, e.g. "A brave fox exploring an enchanted forest". Add character & setting Enters the hero's name and a setting such as forest, school or city. Choose tone & art style Picks a tone (dramatic, funny) and an art style (anime, comic book, realistic). Submit the form Clicks generate: data is sent to the FastAPI /generate route via POST. Outline is generated Gemini Flash creates a structured 5-panel outline with titles, scenes and image prompts. Story is written Gemini Pro expands each panel into narration and character dialogue. Images are created Stable Diffusion draws a comic-style image for every panel prompt. Comic preview appears The layout builder matches images and text; comic_preview.html shows the comic. Review the comic The user reads the panels, checking the story, dialogue and visuals. Regenerate if needed Changes tone or art style and resubmits; the whole pipeline runs again. Download the PDF exporters.py compiles panels into a PDF (FPDF) with a timestamped filename. See export success The user is redirected to export_success.html confirming the download. Save, print or share The PDF is saved, printed or shared with friends and family. Create another comic Returns to the home page with a new idea, character or art style. Build on the API Developers and testers call /generate-comic/json and /test-image directly. Keep a collection Exported comics in the exports folder become a personal story library.	Browser, social media, search engine Web browser; app home page (index.html) index.html on the website Form on index.html (text fields and dropdowns) Story prompt text field on index.html Character name and setting fields on index.html Tone and art style selectors on index.html Generate button; POST request to FastAPI /generate Backend calls Gemini Flash (models/gemini-1.5-flash) in gemini_flash.py Backend calls Gemini Pro (models/gemini-1.5-pro) in gemini_pro.py image_generator.py runs Stable Diffusion; images saved to static/panels layout_builder.py; comic_preview.html in the browser On-screen comic preview page Same input form on index.html; /generate runs again Download button; exporters.py (FPDF); static/exports folder export_success.html confirmation page PDF viewer, printer, email or messaging apps index.html home page JSON requests (PromptRequest) and the /docs API page Local PDF files in static/exports	■ People: Who do they see or talk to? ■ Places: Where are they? ■ Things: What digital touchpoints or physical objects would they use?	G Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Help me make a comic without drawing skills Help me start quickly with no sign-up hassle Help me understand what this tool can do Help me know exactly what to enter Help me turn my idea into a story Help me make the hero and world mine Help me get the mood and look I imagine Help me start generation with one click Help me get a clear, well-structured plot Help me get engaging dialogue and narration Help me see my story come to life visually Help me see the full comic in one place Help me check it matches my vision Help me try a different mood or style easily Help me keep my comic in a shareable format Help me feel sure the export worked Help me show off what I created Help me make more stories quickly Help me integrate comic creation into my own tools Help me revisit my favourite comics	+ Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Simple, focused page with a scenic background Short form with only five fields is easy to fill Fun to turn a one-line idea into a story Choosing tone and art style gives creative control Fast, structured 5-panel outline from Gemini Flash Creative, cohesive narration and dialogue Vivid comic-style panels appear for each scene Excitement of seeing the finished comic preview Easy to iterate until the mood feels right Professional PDF with images and narration Clear confirmation that the comic was saved Pride in sharing a personal comic	- Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Unsure what makes a good prompt No progress indicator after clicking generate Image generation can be slow, especially without a GPU Some images may not match the scene perfectly Regeneration reruns the whole pipeline and takes time Only a fixed 5-panel length is offered API errors or timeouts can interrupt generation	! Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Add sample comics and a short demo on the home page Show example prompts and tooltips for each field Let users upload a character reference image Add a loading screen with live progress per panel Use GPU acceleration, caching and consistent character prompts Allow editing or regenerating a single panel Save previous versions to compare styles side by side Offer PNG, CBZ or shareable-link export options Add one-click social sharing Add user accounts and a saved comic gallery
